Fiscal Analysis

ASSUMPTIONS:

Department of Labor and Industry

1. Based on the information from the radiologic technologist-working group, it is estimated that approximately six radiologic technicians will apply for a radiologist assistant endorsement with the Board of Radiologic Technologist each year.
2. Section 1 adds an endorsement as a radiologist assistant to a radiologic technologist license. To implement this endorsement, the Board will be required to hold one additional two-day full board meeting for the purpose of drafting administrative rules in FY 2004 at a cost of \$2,055 for travel, per diem, lodging and meals.
3. Section 1 will require drafting rules and conducting a rule hearing for the board to implement the radiologist assistant endorsement in FY 2004 at a cost of \$1,307.
4. Implementation of the radiologist assistant endorsement will require a review of the plan for supervision of the radiologist assistant and a contract inspection. The plan for supervision will be reviewed by two radiologist board members who are licensed physicians and a licensed radiological technician will perform the contract inspection. The annual cost associated with the six review plans and inspection will be \$900.
5. No fees will be charged for the endorsement to the radiological technician license. Revenue generated by the licenses will be sufficient to cover the costs of administering the addition of the endorsements.
